10 th Annual Report **WOMEN ON BOARD** 2022 Türkiye

Sabancı University Corporate Governance Forum

Corporate Governance Forum's Projects Related with Women on Boards Independent Women Directors (IWD) Project

Sabanci University Corporate Governance Forum (CGFT), in strategic partnership with Egon Zehnder International (EZI) Türkiye, initiated the "Independent Women Directors (IWD)" project in 2012. The initiative was motivated by the CMBT's (Capital Markets Board of Türkiye) ruling that came to force in January 2012 requiring 1/3 of the board members to be independent. Although the same ruling recommended inclusion of at least one female director, the result was dilution of boards with respect to women from 12.5% in 2011 to 11.5% in 2012, since companies increased their board size and predominantly appointed men as independent directors to comply with the ruling. IWD is a response to this unintended consequence of the ruling.

The IWD Project aims to encourage and help companies to consider female candidates when nominating independent directors. To this end, a database of qualified women is maintained. Each candidate application is evaluated against the criteria established by the Forum and EZI Türkiye. As of the end of February, 2023 IWD database has 313 board-qualified women. The women who are qualified for the IWD database are included in the Global Board Ready Women (GBRW) olarak database if they apply, without going through a separate assessment process.

In 2013, CMBT revised its recommendation upon considering the draft proposed by IWD. Accordingly, the new clause 4.3.9 of the CMBT's current Corporate Governance Principles required the listed companies set a target rate for female board members of no less than 25% and a target date and establish a policy that will make it possible to reach these targets. The board is expected to evaluate and report the progress made in reaching the target on an annual basis. The ruling is based on the "Comply or Explain" approach and the companies who do not set a target must explain the reasons why they don't comply in their mandatory annual Corporate Governance Compliance Reports.

Since 2012, the IWD Project has helped a number of companies and investors, including IFC, to find suitable female board nominees. The Project also includes a shareholder initiative that makes use of mandatory electronic general assemblies in Türkiye to ask questions to the boards with all male boards about their gender diversity targets. Within the scope of the IWD project, researchers collect data on boards, analyze the trends, conduct academic research and disseminate the findings. Using the data collected, researchers calculate Women Empowered Boards Index developed by scholars at Sabanci Business School and award boards that score highest in various categories.

¹ Started by the European Business Schools/Women on Board Taskforce and supported by the European Commission, Forte Foundation and the Financial Times Non-Executive Directors' Club, Global Board Ready Women is a global initiative. The Global Board Ready Women searchable database has been created in an effort to identify and promote Senior Women Executives and Professionals.

30 Percent Club Türkiye

On March 22, 2017 Borsa Istanbul (BIST) hosted the launch of the 30% Club's Türkiye Chapter as a business led campaign, aimed at improving corporate boards' gender diversity. The founding members of the 30% Club Türkiye represent most of Türkiye's powerful business groups that collectively dominate the stock market.

The 30% Club in Türkiye is a spin off from the Independent Women Directors Project. The Forum, which maintains a database of female talent and tracks improvement in BIST boards' gender diversity, facilitates and coordinates the 30% Club Türkiye campaign.

Board of Directors of the 30% Club Türkiye has set the following targets for the campaign:

These targets correspond to approximately a three-fold increase in the number of professional women on corporate boards from the current level considering that half of the women sitting on corporate boards today are members of controlling shareholder families.

Messages from 30 Percent Club Türkiye Board Members

Ahmet Dördüncü 30 Percent Club Türkiye / Country Leader

Gender equality, or rather inequality in working life, is a common problem in the whole world. Although awareness of the economic loss caused by this inequality has been increasing in time, unfortunately the result is still far from the targets. Scientific research reveals that where women are more involved in the boards, the decision-making of boards has more positive effects on the business results of companies. The more female workforce in the economy should no longer be a choice but a necessity. For this reason, we need to take action beyond awareness discourse in order to fulfill our responsibilities towards society and the environment. On behalf of this, I fulfill my duty with great happiness. I will always continue to support more women employees at all levels so that they can take more active roles in business life.

Melsa Ararat 30 Percent Club Türkiye | Board Chair

Women are done trying to convince male-dominated corporate leadership that they are at least as good as their male counterparts! They demand the rule makers stop 'asking boards nicely' and intervene to end conscious or unconscious discrimination. The hopes are high that Türkiye will align its regulatory framework with that of the European Union to be effective in the year 2026 when the EU Gender Quota Law will come to force in all member states.

I am happy that the members of the 30% Club Türkiye, as a group, outperformed all BIST indices with an average of 25.7% female directors and 17% female chairs. Club members are committed to inspiring their peers and moving forward to gender parity in corporate leadership.

Bilgün Gürkan

Bank of Bahrain and Kuwait (BBK) Türkiye Representative Office

Country Manager

Global companies with women on the Board have better performance as Board performance and corporate governance impacted positively by having woman.

Gender balance needs to be included in the business strategies of Turkish private and public sector companies.

Turkish business world is focusing more on the sustainability and on corporate governance.

Business leaders need to raise awareness for the importance of gender diversity at Boards and at the management levels .

Our Turkish companies, economy and our society can not advance further without woman at Boards and at management. Inviting Turkish businesses to focus on this topic so that our country to reach to the level of global companies.

Cenk Alper

Sabancı Holding CEO

Although it is promising that the ratio of women on boards of directors in Türkiye has increased from 11.5% to 17.5% in the last 10 years, it is an indisputable fact that we still have a long way to go. We now have to take action much faster on issues that threaten the future of the world, such as the climate emergency and gender inequality.

The age we live in is an age of responsibility. And that responsibility is not so light that any one of us can take it alone. On the other hand, it is out of the question for any

company or institution that has set sustainability as a goal to evade this responsibility. As Sabancı Holding, we are proud to lead our country today, as we have done so far, with 44% female representation on our Board of Directors and a female executive ratio of 40%.

Cüneyt Yavuz Mavi | CEO

The ability of each individual to exist equally and actively in all areas of life, regardless of their gender, is one of the main determinants of the development level and success of that society. In recent years, many steps have been taken in this regard in Türkiye. I believe efforts need to continue without slowing down until an ideal gender representation is reached. In 2022, 3 out of 10 companies in our country did not have a woman on their boards. We have ways to go. I believe that every progress made towards achieving gender equality is important, and I am convinced that the business world needs to and can create a leverage effect on this

journey by implementing pioneering approaches and leading the way. As a company comprising of 58% female employees, Mavi carries out numerous initiatives to further move in the right direction. We are pleased that the rate of women is 51% at our management level and 33% on our Board of Directors, and we are committed to continue to work without slowing down to improve these levels even further.

Ebru Dildar Edin

Business World and Sustainable Development Association (SKD Türkiye) *Chair*

Although gender equality improvements in business life are gaining momentum, some news raises concerns about its continuity. We expect the European Parliament's recent decision to impose a quota on women on boards for publicly traded companies in the EU will constitute a "milestone". In the EU making this decision, 30% of the board members in companies are women. The report we published states that we have reached only 17.5% of the women on the Board of Directors.

On the other hand, the fact that the rate of independent female members has exceeded 40% is pleasing, but the recently published Reykjavik Leadership Index indicates a decrease in trust in female leaders. When we look at the reason for this, we see that there are stereotypical prejudices and deepened gender inequality. Therefore, we need to work much harder both to increase the representation of women and to empower women wherever they are.

Ebru Köksal Professional Footballers' Association Independent Non-Executive Director

Achieving gender diversity and inclusion on boards and C-Suite of companies requires the engagement of both women and men at the top decision making levels. At 30% Club, we make sure increasing femal representation is everyone's responsibility.

Füsun Akkal Bozok

FORD Otosan & Tat Board Member

The diversity of decision-makers is a very important factor in the success of institutions. Diversity brings various perspectives and visions, which leads to success. Ten years ago, when we started the project on increasing the representation of women on boards, the rate of female board members was 11.5%, now it is 17.5%. Although this indicates a very slow improvement, the good news is that the rate of independent women on boards has increased from 7.7% to 40.8%. We should congratulate all institutions, companies, and individuals

who contributed and worked together during this period. Also, we still have a lot of work to do because we need to support women everywhere as decision-makers for equality and justice as shown by science and intelligence.

Murat Kolbaşı Arzum | Chair

The diversity of decision-makers is a very important factor in the success of institutions. Diversity brings various perspectives and visions, which leads to success. Ten years ago, when we started the project on increasing the representation of women on boards, the rate of female board members was 11.5%, now it is 17.5%. Although this indicates a very slow improvement, the good news is that the rate of independent women on boards has increased from 7.7% to 40.8%. We should congratulate all institutions,

Murat Yeşildere Egon Zehnder | Senior Partner

More than a decade ago, our journey (as BKD and consequently 30% Club Türkiye chapter) has started with CMB's "comply or explain" recommendation about BIST listed companies appointing at least one female director to their boards or explaining to the public why they failed to comply. Over the past decade, we have witnessed almost 50% increase in the ratio of female directors in listed company boards from 11.7% in 2013 to 17.5% in 2022. Let's all cherish this achievement!

Having said that the "gap" is so big that it will not be possible to close with organic growth. There is need for immediate

"intervention". Almost one third of BIST listed companies still do not have a single female director on their boards! Someone must remind the Chairs, Board Members, shareholders of these companies that "we are living in the 21 st century" and they should not be the last "MAN" standing to bear the shame of the last company with no female director on its board!

Let us all remind ourselves "If Not Us Who" will correct this situation and "If Not Now When"?

Nazan Somer Özelgin

Mapfre Sigorta Chair

When we look at the representation of women on boards, it seems that Türkiye has still been in very slow progress, but I think that the work of both initiatives, NGOs, and companies on this issue is very valuable and result-oriented. On the one hand, these activities increase public awareness, on the other hand, they facilitate the access of women professionals to trainings and mentoring activities that will prepare them for this board role and enable them to have merit. A candidate pool that is qualified to meet the demand for female candidates continues to grow and

develop in parallel with the awareness of the public and companies. I am impatient to see that the results of these studies are reflected in the numerical data as soon as possible, and I believe that the individual and institutional efforts will certainly yield results in order for women to reach the levels they deserve in the business world.

Oya Şener Fiba Retail Group | Head of Retail

It is an undeniable fact that the success of women will contribute not only to the economy but also it has a positive impact on family life and raising future generations. Our job is not only equality between men and women in business life, but equality in all areas of life. We are working to increase women's employment at the management level and on boards of large companies that shape our economy. We aim to be an example and pioneer for our women by increasing the number of women leaders, who are currently few in number, with reference to future successes.

Özgür Tokgöz Altun

Boyner Group CFO and Member of Executive Committee

Representation of women equally in both management boards as well as in all the spheres of life is not a preference but a necessity of human rights. This is not only a matter of reputation, but also an important driver that directly affects the financial and operational success.

Researches show that companies with female leaders on board and senior management and countries led by female leaders demonstrate a better crisis management. Despite all these substantial outputs, there is still a long way to go both in our country and in the whole world.

"Women in Management Boards" report issued by Sabancı University Corporate Management Forum has been demonstrating the related facts and figures for 10 years and supporting us to determine the roadmap for taking the right actions. I believe that women will attain the deserved equality in business life with the studies we carry out with such valuable outputs.

SECTION 1 | INTRODUCTION

Women occupy just 20% of board seats of largest listed companies globally and continue to be excluded from the highest levels of corporate leadership. This has consequences not only for companies, employees, investors and the economy in general, but also for the society and environment. Gender diverse boards make different and better decisions when it comes to trade-offs between short term profit and sustainability.

This 10th annual report on gender diversity in corporate boards in Türkiye, reveals a stagnated picture in women's representation in this highest decision making body of publicly listed companies in Türkiye. The marginal improvement from 16.7% in 2021 to 17.5% is hardly an indication of an upward trend since it partly compensates the 2021's worsenining figures compared to a year before. This stagnation may be surprising to the outsiders since it contradicts with the international trends. Women have continued to make gains in the US in 2022, holding a record 28% of board seats on the Russell 3000 index. The European Parliament formally adopted the new EU law on gender balance on corporate boards in November 2022. By 2026, companies will need to have 40% of the underrepresented sex (guess which it is), among non-executive directors or 33% among all directors. Today, 30.6% of board members in the EU's largest listed companies are women, but with significant differences among states (ranging from 45.3% to 8.5%).

In the 2021 Women on Boards in Türkiye report, we associated the declining percentages of women on boards in Türkiye by two factors; high number of initial public offerings by companies with a lower percentage of female directors than the BIST average, and worsening status of women in Türkiye in general. We backed our claim for the latter by Türkiye's lowered ranking in the World Economic Forum's (WEF) Gender Gap Index and increased number of femicides, compared to 2020. In 2022, Türkiye's Gender Gap score did not improve, altough Türkiye moved up in ranking from 130 to 124 since lower number of countries were covered. In 2022, violence against women continued to climb. The number of femicides and suspicious deaths of women reached 579 compared to 497 in 2021. 16 women were killed at work. The figures represent an upward trend in gender based violence since 2020. We reiterate what we said in 2021 report; women's position in corporate boards are closely linked to the wider context in which companies operate. A retreat of human rights and democracy goes hand in hand with masculine restoration in both private and public spheres.

In 2022, the board trends we have been reporting since 2012 have not changed. Boards have an average of 7 directors. 17.0% (428) of 2516 elected directors were women and these women filled 17.5% (563) of all board seats. The ratio of female directors amongst independent directors continued to rise at a higher pace and reached 21.9%. 50.7% of all newly appointed female directors were elected for independent director seats. Female independent directors are slightly more preferred as committee members than their male peers; 22.4% of corporate governance committee members and 21.5% audit committee members, and 20% and 16.2% of committee chairs respectively, were women. New companies had only 15.5% women on their boards and 33 out of the 63 new IPO companies had all male boards. Investment banks appear to be poor advisors for IPO companies when it comes to board structure. A change in BIST listing rules can compensate.

BIST Sustainability Index companies have the highest percentage of female directors at 25% followed by Corporate Governance Index at a marginally lower 24.8%. To our surprise, some companies in both indices have all male boards.

In 2022, only 25 BIST companies were run by a female CEO and only 38 companies had a female chair, majority of whom were affilited with the controlling families. A stagnant 33% (158) of BIST companies have all male boards. BIST 100 companies, Türkiye's largest, finally caught up with the BIST average in 2022 with 17.5% women on their boards. 21 companies amongs BIST 100 still have all male boards.

A possible ruling that mandates at least one female board member in listed companies would add 158 female to the boards and increase the percentage of women on boards to 22.5%. A change in listing rules requiring at least one female director would add 33 women and increase the percentage to 18.6%. Such rulings, however; are unlikely to change the way the businesses are run until the pipeline stops leaking women and the percentage of women in executive roles increase significantly.

Women are done trying to convince male dominated corporate leadership that they are at least as good as their male counterparts and demand the rule makers to stop 'asking boards nicely' to end concious or unconcious discrimination. I am happy that the members of 30% Club Türkiye outperformed all BIST indices with an average of 25.7% female directors and 17% female chairs. Club's members are comitted to inspire their peers.

Melsa Ararat, PhD Board Chair, 30% Club Türkiye Member of the Global Steering Group, 30% Club Advisory Board Member, Sabancı University Corporate Governance Forum

SECTION 2 | WOMEN ON BOARDS IN TÜRKIYE 2022

In 2022, CGFT researchers collected publicly available data on the board of directors and board committees of the companies listed in BIST, using Public Disclosure Platform and company websites with a cutoff date of 30 September 2022. CGFT has been combining publicly available data on boards with hand-collected data on the attributes of the directors since 2012. This effort enables categorization of directors into professional directors and affiliated directors who are members of the controlling families or direct shareholders. The objective of this categorization is to track the progress in the likelihood of professional women breaking the glass ceiling.

The analysis presented below represents the current picture and the trend in BIST companies with respect to gender diversity on boards between 2013-2022.

Overview of Board Seats

In 2022, there were 475 companies listed in BIST, the highest number since 2012. Accordingly, the total number of board seats reached 3211, compared to 2870 in 2021. Similarly, the number of independent board members reached 1048, the highest number since 2012 as seen in *Chart 2.1.* The average board size remained at 6.8, same as in 2021. The ratio of independent directors is 32.6%, slightly higher than 31.0% in 2021.

In 2022, 428 women held 563 board seats, whereas 2088 men held 2648 seats as shown in **Table 2.1**. The percentage of women holding multiple directorships is 18.7 % (80 out of 428). The percentage of men holding multiple directorships is slightly lower at 16.8% (351 out of 2088). For the first time since 2012, more females hold 4 or more seats compared to male directors. Table 2.1 presents the numbers of board seats occupied by men and women in detail. **There are 42 male and 13 female directors who sit on more than 4 boards.**

	Table 2	2.1 Wo	men an	d men	holding	ı multip	ole direc	ctorship	os in 2C)22	
Number of Chairs	Ē			- 						Number Of Individuals	Total Directorships
Female Directors	348	49	18	5	5	3	-	-	-	428	563
Male Directors	1737	223	86	22	10	4	4	1	1	2088	2648
All Directors	2085	272	104	27	15	7	4	1	1	2516	3211

Overview of Male and Female Board Seats in BIST

Chart 2.2 represents the change in total number of board seats and the number of female and independent directors between 2013-2022. Out of 1048 independent directors in 2022, 230 were female. The ratio of female independent members within the total number of independent members has been increasing since 2012.

Overview of Gender Diversity in BIST Company Boards in 2022

In 2022, out of 475, 158(33,3%) BIST companies did not include any female directors in their boards compared to 139 (33,1%) companies in 2021. Those companies with all male boards are listed in Appendix A. *Chart 2.3* presents the breakdown of companies with or without female directors in 2022.

Chart 2.4 demonstrates a change in the ratio of companies with at least one female director between 2013-2022. In 2022, 66.7% of the companies had at least one female board member and this figure barely changed from 66.9% in 2021.

Overview of Female Directors in BIST

In 2022, women were elected to 563 seats in the boards of companies listed in BIST. This number represents 17.5% of all directorships, increased from 16.7% in 2021. On the other hand, as shown in *Chart 2.5* below, the ratio of female independent board members to all independent directors increased from 19.3% in 2021 to 21.9% in 2022.

Overview of Family/Shareholder Female-Male Directorships in BIST

In 2022, there were 197 female directors affiliated with controlling shareholders and owner families in BIST compared to 187 in 2021 representing 39% of all female directors in 2021 and 35% in 2022.

Breakdown of Female Directors on BIST Boards

The breakdown of female directors in BIST company boards is presented in **Table 2.2** below. The board seats occupied by professional women have increased from 292 in 2021 to 366 in 2022. The number of female family members has slightly increased to 197.

	Table 2.2 Numbe	er of Fe	emale	Directo	ors in E	BIST be	etweer	2013-	2022		
	Years	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022

In 2022, out of 563 female directorships, 208 (37%) are held by female directors who are non-executive but not independent, whereas 230 (40.8%) are independent. As shown in **Chart 2.7**, only 125 (22.2%) of the female directors have executive responsibilities, compared to 23.5% in 2021.

Chart 2.8 below shows the breakdown of statutory positions of female directors as required by the Capital Markets Board as independent, executive, and non-executive directors.

New Appointments

In 2022, 154 new female directors were appointed to BIST boards, a higher figure than 102 in 2021. Out of 154, 78 are independent, 53 are non-executive (but not independent) and 23 are executive directors. 29 of the newly appointed women are affiliated with controlling families. *Table 2.3* provides an overview of female board appointments and resignations in 2022.

Table 2.3 Number and Percentages of New Female Board Member Appointments and Resignations in 2022

Appointments* 2022	#	%	Resignations* 2022	#	%
New female board appointments	154	-	Female board resignations	70	-
New independent female appointments	78	50,7	Independent female resignations	23	32,9
New non-executive female appointments	53	34,4	Non-executive female resignations	37	52,9

*% represents the new female appointments

Women and Men in Chairperson/CEO/General Manager Positions on BIST Boards

Only 41 companies have appointed a female chairperson in 2022 corresponding to 8.6% of all companies. As shown in Chart 2.9, 38 of the 41 female chairpersons are affiliated with the controlling families and/or they directly own a significant number of shares. Only 3 professional women were appointed as the board chair again this year compared to 149 professional men.

In 2022, 25 companies have female CEOs who sit on the board, corresponding to only 5.3% of all BIST companies. The number of male CEOs is 220 representing 46.3% of all companies as shown in Chart 2.10. Out of 220 male CEOs, 59 have dual roles both as CEO and Chair whereas only 2 women have dual roles as both. 230 companies (48%) did not include their top executives in their board.

Presence of Women on Boards in Different Sectors

Table 2.4 presents an overview of female directors serving on BIST Companies' boards in different sectors. 84.6% and 75% of the companies in two major sectors, namely Wholesale and Retail Trade, Hotels and Restaurants and secondly Professional, Scientific and Technical Activities, have at least one female on their boards.

Table 2.4 Female Directors in different industries in 2022

Composition of Board Committees

All companies have mandatory Audit Committees and Corporate Governance Committees. Some companies have other committees such as the Sustainability Committee. 21.3% of Audit Committee seats and 22.4% of Corporate Governance Committee seats are filled by women as shown in *Table 2.5*. These figures correspond to 196 seats in audit committees, and 227 seats in corporate governance committees.

Chart 2.11 presents the progress in gender diversity in board committees over the years. The seats occupied by female directors in audit, corporate governance, and risk committees have increased over the years especially in 2022.

In 2022, 20% of corporate governance committees, 15.6% of audit committees and 16.2% of Risk Committees had a female chair.

Gender Diversity in Boards in Main BIST Indices *BIST-100*

BIST-100 index includes the largest and economically most significant companies in BIST. The changes over the years in the representation of women in these companies are presented in Table 2.6. As shown below, the percentage of women on boards of BIST-100 companies is 17.5 % in 2022. The ratio of independent female directors is 24.4% in BIST 100 Companies, higher than 19.3% in 2021.

Table 2.6 Changes in the ratio of women in BIST 100 companies between 2017-2022

 Table 2.6 Changes in the ratio of women in BIST 100 companies between 2012-2016

	20	2012		2013		2014		2015		2016	
	#	%	#	%	#	%	#	%	#	%	
Total number of board seats	818	-	862	-	853	-	882	-	846	-	
Female held directorships	82	10.0	97	11,3	88	10.3	100	11.4	99	11.7	
Man held directorships	736	89.9	765	88.7	765	89.7	772	88.6	747	84,7	
Independent directorships	193	-	246	-	263	-	259	-	248	-	
Independent female directorships	10	5.2	17	6.9	20	7.6	19	7.3	18	7.3	
Independent male directorships	183	94.8	229	93.1	243	92.4	239	92.7	230	92.7	

As shown in **Chart 2.13**, 21 companies in BIST 100 have all male boards in 2022. The largest companies in BIST started to move towards diversity, however the number of companies with all male board members have just dropped to under 25.

BIST Financial Index, BIST Corporate Governance Index and Sustainability Index

There are 122 companies in BIST Financial Index, 61 companies in Corporate Governance Index and 7 companies in Sustainability Index in 2021. Percentage of female directors in the companies that constitute the Corporate Governance Index has increased from 18.7% in 2021 to 24.8%. Also, the percentage of female directors in the Financial Index increased from 17.1% in 2021 to 21.3% in 2022. The percentage of female directors in Sustainability Index is the highest at 25%. 30% Club members had the highest percentage of women on boards at 25.7%.

SECTION 3 | WOMEN EMPOWERED BOARD INDEX

In presenting statistics on women on boards in Türkiye, we use the same methodology (as in previous years) explained below.

3.1 Classifying Women Directors

We differentiate female directors who sit on the boards as direct shareholders or representatives of controlling families from professional female directors. The concept of "glass ceiling" in Türkiye refers predominantly to professional women. Therefore, we classify woman directors as:

• Directors who are members of the controlling families in family-controlled firms, and/or directors who are direct shareholders

• Professional directors

Furthermore, we classify all woman directors in accordance with the applicable laws and regulations in Türkiye as:

•Executive •Non-executive (but not independent) •Independent

Non-executive directors may not qualify for independence when they are affiliated with the controlling shareholders, when they hold significant percentage of shares in the firm, or when they are professionals affiliated with other firms in the business group if the firm belongs to a business group.

3.2 Calculating Diversity

We are interested in "diversity" as well as "female presence". Therefore, we measure gender diversity using Blau's¹ index of heterogeneity. For gender diversity, Blau index can range from zero (when only one gender is represented on the board) to 0.50 (when there are equal numbers of men and women). Gender Diversity Index (GDI) values of BIST MAIN and STAR companies based on Blau are presented in Appendix B, and the top scoring companies are listed in Table 3.1.

3.3 Calculating Woman Power

Power represents the ability to exert influence on decision-making. We define five sources of comparative power as 'influence variables' adopted from Finkelstein's taxonomy²:

¹ Blau, P. M. 1977. Inequality and heterogeneity. New York: Free Press.

² Finkelstein, S. & Hambrick, D. C. 1996. Strategic leadership: Top executives and their effects on organizations. Minneapolis: West Publishing.

• W = Presence of Women (percentage of female directors in the board)

• WBC = Committee Membership Power (percentage of seats occupied by women in all board committees)

• WP = Professional Authority Power (percentage of female directors among all professional directors - professional directors)

• WI = Independence Power (percentage of independent female directors among all independent directors)

• WC = Chair/CEO Power (percentage of women in chair and CEO positions - this variable takes the value of 0 if both the chair and the CEO are male, 0.5 if the CEO is a woman, 1 if both the chair and the CEO are female.

In the case of a female chair, the variable takes the value of 1 when the CEO is not on the board regardless of the gender. We then make an adjustment for critical mass:

• **CM** = Adjustment for Critical Mass [when the Number of Women **(N)** on the board is greater than 2, the firm is rewarded by a Critical Mass adjustment value of (N-2)/BS where **(BS)** is the Board size].

Women Empowered Board Index (WEI) is calculated as follows:

WEBI = a (W%) + b (WBC%) + c (WP%) + d (WI%) + e (WC)	for N < 3
WEBI = a (W%) + b (WBC%) + c (WP%) + d (WI%) + e (WC) + f (CM)	for N > 2

All coefficients are taken as one in the Index calculation. In the future we plan to calculate these coefficients empirically when data set covers a sufficiently long period.

About Sabancı University Corporate Governance Forum

Corporate Governance Forum of Türkiye (CGFT), founded on Ist of March 2003 as a joint initiative of Turkish Industrialists and Businessmen's Association (TUSIAD) and Sabanci University is an interdisciplinary and cross-sectorial initiative hosted by Sabanci Business School. CGFT's outreach work focuses on corporate behaviour and practices around issues that can impact socio-economic welfare. Forum's mission is to contribute to the improvement of the corporate governance framework and practices. Forum strives to achieve its mission by undertaking or commissioning scientific research, encouraging and facilitating dialogue between academicians and practitioners and by active engagement in policy development and practice development initiatives.
